

PRODUCT/S MEASURING WORK SHEET

1. Always use a metal tape measure and provide exact measurements, our factory will make adjustments if necessary.
2. Measure every window even if they look the same as there might be some variation and never order your blinds straight of house plans.
3. If measuring with a partner, make sure they repeat the measurements out loud as they write them down.
4. Double check all details are correct before ordering.
5. Start measuring from front door and keep measuring windows in order going to your left and finishing at the front door. Having your blinds in order will be easier when you order as front door will be blind 1, next window on your left will be blind 2 and so on.

Product	Room name	Fabric/Colour	Width mm	Drop mm	Face/Recess	Control side
